PROFILE SUMMARY

Senior Software Engineer with 5+ years of experience building scalable Python-based backend and full-stack systems. Strong expertise in Django, FastAPI, AWS, Elasticsearch, and event-driven architectures, with experience in CDC pipelines, analytics platforms, and AI/agent applications. Experienced in technical leadership, system architecture, and performance optimization.

PROFESSIONAL EXPERIENCE

Creliohealth -

Senior Software Developer & Team Mentor

Jun 2022 – Present

Leading a team while driving high-impact technical initiatives. Hands-on in large-scale system improvements, technology migrations, R&D, architecture, code reviews, and delivering complex projects from design to implementation

Noteworthy Contributions:

- **Real-Time Search Data Pipeline (CDC Architecture)** :Built a high-throughput CDC pipeline using Debezium and Redpanda to capture MySQL binlog events and ingest them into Elasticsearch, powering system-wide search across **52M+ documents** and processing **~5K events/minute**.
- **Real-Time Analytics Optimization (CDC + TimescaleDB)** :Re-architected Operations and TAT Analytics using CDC-driven TimescaleDB hypertables and continuous aggregates, replacing expensive Elasticsearch aggregations and **improving average dashboard latency by ~200 ms** while reducing Elasticsearch workload.
- **Infrastructure Cost Optimization**: Led the migration of development environment components (Web Services, MySQL, Redis, Elasticsearch and CDC) from AWS to a bare metal server provided by OVH cloud, achieving a 4x cost reduction.
- **Centralized Audit Trail System**: Implemented a robust, system-wide audit logging mechanism using Elasticsearch, enabling detailed change tracking (diff checks) for patient data, reports, and configuration changes across the LIMS workflow
- **ABDM Integration**: Successfully integrated Ayushman Bharat Digital Mission (ABDM) APIs and workflows into the Laboratory Information Management System (LIMS), ensuring full compliance with national digital health standards.

GlobalLogic –

Associate Software Engineer

Mar 2021 – May 2022

Django backend developer for a healthcare domain project with microservices

Noteworthy Contributions:

- **Qualifying life events**: Configurable qualifying life event parameters built into tenant specific services for a seamless workflow.
- **Increasing test coverage**: Increased unit test coverage from 60% to 82%.

PROJECTS

- **AI Job Search Agent** - Multi-agent job discovery platform using OpenAI/LLM agents, Serper APIs and resume-based ranking. [Live Demo](#) | [Github](#)
- **Career Alter Ego** - An AI-powered recruiter assistant that acts as a “career alter ego,” enabling recruiters to interactively explore my professional background, projects, and skills via a conversational interface. Deployed using Gradio on Hugging Face Spaces for public access [Live Demo](#)
- **PYPI package git_ai_pr_review**- AI-powered CLI for LLM-based code review with AST-driven impact analysis. [Live Demo](#) | [Github](#)

SKILLS

Languages: Python, Typescript, Javascript, SQL

Backend: Django, DRF, FastAPI, Flask

AI: Agentic AI, RAG, OpenAI Agents, CrewAI

Data & Search: PostgreSQL, MySQL, ElasticSearch, TimescaleDB

Cloud & Devops: AWS, ECS, ECR, Docker, Git

Frontend: React

EDUCATION

B.E.- Computer Science - *Gyan Ganga Institute of Technology and Sciences*
CGPA- 8.39

Aug 2016- Sep 2020

Class XII- CBSE- Kendriya Vidyalaya
Percentage - 75.6 %

Mar 2015- Apr 2016

Class X- CBSE- Kendriya Vidyalaya
CGPA- 8.4

Mar 2013- Apr 2014
